

THE FORWARD MARCH – 9

THE COMING SERIES

Birth of a child, in the modern age is both ways, we want and we do not want. Natural instinct compels to have, but the economic call denies it. It creates a conflict resulting great insecurities in parent.

Then the parent, the society and the government, behave indifferently. All of them have their own whims and fancies to be fulfilled by the new comer. The whimsical desires have resulted the existing **EDUCATION** for children. It has snatched their child hood. He or she at very early age, is so loaded with so many information in their head that, they attain early maturity, some times even before their tenth. This is the early ripening of the fruits.

The modern age, called as most civilized in the history of human race, has extracted every thing from the nature and in turn has polluted the whole atmosphere. Nothing is natural. All is artificial. The result is, these new creatures have to survive on these by-products of our age.

And then the last but not the least important is the health care provided to our **FUTURE**, which concentrates on all types of strong chemicals.

AND

The victim is the child of our age.

We intend to survey all the above-mentioned factors and their impact on the children and then to put forward what HOMOEOPATHY can do with these children under such adverse circumstances. We are, therefore, under compelling call starting the series:

"THE CHILDREN AND HOMOEOPATHY."

Let us remember that it has been the practice in the whole history of human races that **THE PUBLIC IS THE FINAL AUTHORITY**. No body has ever withstood before the public strength and nor would ever withstand. It has got deep insight, which requires no qualification from any university. It is natural and comes from **collective sub conscious** with out respecting any territory of the nation, the race, the religion and the language. We are individual on conscious and sub conscious levels. Our actions, our feelings and our thinking are different which separate us from each other on these levels, but on collective sub conscious we are one and therefore for any injustice to our existence we behave collectively. It has started in the whole world. There are strong voices against the education system, against the use of chemicals in any form and against the use of vaccination for the children. There is strong awakening of consciousness, which is emerging to save the future species. It is a must and also it is the duty of every sole to raise his or her voice and listen the voices coming to them, for the survival of the human race on this planet.

YOU ARE THEREFORE INVITED TO SHARE THIS FORUM.
