

**FORWARD MARCH-11  
SEPTEMBER-2007  
COSMETICS AND HOMOEOPATHY**

It is one's internal desire, that he or she should look beautiful. To achieve effect is made but generally on the physical plane. The physical is the reflection of one's internal. It is the cause that in spite of all efforts, on physical level nothing good is achieved.

It is the natural phenomenon that all the internal disturbances are being reflected on surface or within out. In homoeopathy this law of nature has been discovered just like Newton discovered the law of gravitation. The internal disturbances appear on skin making once appearance ugly. These manifestations are -

- Skin eruptions – acne, eczema, psoriasis, urticaria, warts and ringworm
- Hyper pigmentation – chloasma, dark discoloration of face and other body parts.
- Hypo pigmentation – vitiligo ( white patches of skin)
- Hair problems – hair loss, premature graying of hair, bald ness, laces and dandruff.
- Nail problems- stunted growth, deformed and split nails.
- Excessive dryness or oily skin.
- Masculine distribution of hair in woman.
- Scars

There are various modern method to remove the above mentioned condition by chemical (cosmetics), radiations (laser therapy) and surgery. All these measures consider that these conditions are separate phenomenon. Thus these measures are suppressive and only remove the end product and not the cause. Actually applying lotions, ointments and other measures, the disease is being forced to the internal system. This causes internal disturbances. More the suppression on physical body, greater is suffering in the internal system.

Internal disturbances, as fast as, the vital force, which maintains the life, are being thrown outside. Homoeopathy acts on one's internal energy, when in its natural form, is reflected on outer envelope, the skin. It is therefore natural healing system. Which offers the most permanent and natural treatment by treating the root cause of disease.
