

FORWARD MARCH – 20  
JUNE-2008  
TUMOURS AND HOMOEOPATHY

INTRODUCTION

Any muscular growth on any part of the body is called tumour. The first important fact about tumours is that they are almost and always benign (non-cancerous) except 10%. They are also various types according to their appearance place.

CAUSES

In Homoeopathic theory, Miasms Sycosis, Syphilis and Psora are responsible for chronic diseases. Miasms imbalance is triggered by harmful life styles.

- *Food:* Eating food with excess of pungent and bitter tastes, contaminated food, eating non-vegetarian food, food containing hair, bones, mud, soil, stones, and thorns.
- *Lifestyle:* Tobacco chewing, smoking,
- Suppression of 14 natural urges like yawning, sneezing, cough etc.
- Ill-treated diseases.
- Heredity
- Hormone therapy.

TREATMENT

Homoeopathy does wonders in dissolving these masses. We have treated many cases with definite result. Homoeopathy is the only system of medicine, which could control and dissolve a tumour. Unfortunately most people do not know what to be done? They are on chemotherapy for some time, and then the next move is to surgically remove the mass. Certainly Homoeopathy the only system, which has curative effects.

In Homoeopathic treatment, a patient's mental characteristics like desire, aversion, attitude, behaviour, physical conditions and food habits are all taken into account within the context of a genetic and constitutional approach to enhance bodily immunity to heal the disease. The focus is not on disease, but on the patient as a whole. It is safe, simple and inexpensive. Homoeopathy has three treatment modes, Medicinal treatment, Managemental treatment and Palliative treatment for acute cases. Homoeopathy can reduce the damages caused by chemotherapy and radiation. Homoeopathic medicines will prevent recurrence. The fully developed Vital force will heal tumours.

CASE

A female age of 52 reported for pain extremities on alternating side on 11.09.2007. She was having four multiple fibroids measuring, 16,13,23,24 mms in size. Uterus was also bulky in size measuring 101mmsx86mmsx65mms. Based on these symptoms she was prescribed Picric acid 6(wp) for 15 days followed by Saclac. Boils came out on thighs and numbness also better. On the basis of family history she was prescribed three doses of Carcinosisin 200 followed by one dose of Phosphorus 200 on 25.02.2008. Now on next USG report Uterus size is normal and Fibroids are only three with reduced size.
