BREAST TUMOR AND HOMEOPATHY

Mind is the highest authority of the human body. It rules all the organic functions. Anything which affects the mind will automatically affects the body and its functions. Mind is governed by the feelings and emotions. Relationships are complex social interactions full of memories and emotions. If one has lost a child, or a relationship has ended up in disappointment, if mental shock or stress is unresolved, then negative feelings may build up, which are toxic and harmful for the individual. These emotional toxins may combine with environmental, social and nutritional factors and increase the darkness and stagnation within the body. When these toxic, unresolved, disappointed emotions settle in the connective tissue, takes the form of a tumor. Tumors are the product of the individual and to cure it properly, the power to produce the tumor should be eliminated from the body. Cutting off tumor probably makes the patient free from the tumor but leaves the producing power within the body. And very often it is seen that the surgical interference increases the tumor-producing power, which enhances the growth of the tumor and makes it fatal.

To refresh the tissues and cells, homeopathy acts as a natural cleanser. Homeopathy treats the person as a whole. It means that homeopathic treatment focuses on the patient as a person as well as his pathological condition. The homeopathic medicines are selected after a full individualizing examination and case-analysis, which includes the medical history of the patient, physical and mental constitution etc. The predisposition or the susceptibility of the patient is also often taken into account for the treatment of chronic conditions.

BREAST TUMORS

Breast tumors are non cancerous and harmless tumors which are made up of fibrous tissues of the breast. The incidence of breast tumors reduces with increasing age. Breast tumors may be smooth, round and easily movable swellings. Generally it is painless and may affect both breasts. Pain and tenderness (pain when touched) may be present especially before periods and subsides after periods. Transformation of breast tumor into cancerous tumor is rare. In such cases, there will be sudden increase in size of tumor. Pain in breast will not be affected by menstrual cycle; tumors will be hard and immovable.

PRECIPITATING FACTORS

Environmental factors such as, frequent exposure of the sensitive breast tissue to the X-ray radiation is very risky. Radiation itself might cause cancer. Another major factor is hormonal therapies such as birth control pills, infertility treatments, and hormonal replacement therapy: all these drugs use estradiol (hormone) which helps tumor cells to grow. As soon as hormones get balanced, tumor ceases to grow.

HOMOEOPATHY

Homeopathy works wonderfully in cases of breast tumors. Homeopathy has good supportive role in the mild, moderate and advanced cases of tissue changes. Homeopathic

medicines are prescribed after studying patient's complete case history. It enhances the body's self healing mechanism (immunity) and helps to regress the breast tumor. The aim of homeopathy is not only to cure the disease; rather it is to cure the individual. It helps the individual to attain a state of peace, calmness and happiness. So that he can enjoy his existence. It is the state, where his mind can rest and lives a stress-free life. Hence no toxic emotions will be realized and the individual will be healthier. Once, the highest authority of the body is relaxed and free from diseased emotions, the tumor will start disappearing and with a span of time, it will go away from the body, leaving the individual in a cured state.

There are various symptoms listed in homeopathic repertory regarding breast tumor which helps in individualizing the case such as breast tumor after injury, breast tumor accompanied with hot perspiration or stomach complaint, left sided breast tumor, breast tumor hard schirrhous like, painful.

CONCLUSION

Two things are there in abnormal growths - the pathological condition and the phenomena of that condition. *All the pathologies or tumors are the finished products, the ripened fruits, the important milestone of the disease phenomenon; the creation of the perverted prolonged life force. So no tumor or pathological condition is the primary cause of any disease, it is the disturbed and stressed life force (immunity) which precedes disease phenomena.*

J.H.ALLEN -We must go back to the life force for all action and all change in the structures of the organism itself. A tumor is but an inhibitory point due to perverted life action.
