FIBROID AND HOMOEOPATHY

It is the sick person that is to be treated, not the pathological name- J.H.Allen

Dr.Hahnemann, the father of homeopathy has mentioned in Organon of philosophy (the Bible of homeopathy) about VITAL FORCE which animates the material organism (human) in health and in disease. It is responsible for all sensation and functions of life. "The inimical forces, the infective agents are partly psychical, partly physical, to which our human existence is exposed, do not possess the power of morbidly deranging the health of man unconditionally". It means the ILLNESS is conditional because it only occurs if the individual is susceptible to the attack of the pathogenic agents and adverse circumstances. When a person falls ill, it is only this spiritual, self acting (automatic) vital force, everywhere present in his organism, is primarily deranged by the disease force manifested by the signs and symptom. *Signs and symptoms are the external manifestation of the internal essence of disease.* All such morbid derangements (diseases) cannot be removed from it by the physician in any other way than by the spirit-like (dynamic, virtual) alterative powers of the serviceable medicines (homeopathic medicines) acting upon our spirit-like vital force. The homeopathic medicines are prescribed on the symptomatology; *symptomatology is general not the local, so homeopathic medicines cannot be selected on local manifestations like tumour, fibroids, cysts, warts etc.*

A fibroid is a tumor of muscles in the uterus. Another name for them is myoma. Uterine fibroids are benign tumors of the uterus. They rarely grow after menopause. Only 0.5% of all fibroids develop into cancer. Fibroids can grow as a single tumor, or there can be many of them in the uterus.

Symptoms: some women with fibroids can have:

- Heavy bleeding (which can be heavy enough to cause anemia) or painful periods
- Feeling of fullness in the pelvic area (lower stomach area)
- Enlargement of the lower abdomen
- Frequent urination
- Pain during sex
- Lower back pain
- Complications during pregnancy and labor
- Reproductive problems, such as infertility, which is very rare

In modern medicine, the only efficient treatment for uterine fibroids is surgery, but it can have disastrous consequences, the worst of which is the case of hysterectomy (removal of the uterus), in which the problem is literally cut away.

Homeopathic Treatment

It is possible to heal uterine fibroids by taking the correct homeopathic remedy. This means to find a remedy that would describe the essence of the entire state of the patient, could be a too long shot, in most cases. If it is treated in this way, there would be no need neither for surgery nor for any other kind of medicine at all. A treatment with homeopathic remedies can stop the

unwanted growths and enables to continue living with the reproductive organs as a whole. Homeopathy can help here, in a non-harmful way. Various conditions in which homeopathy has specific medicines are given below:

FEMALE GENITALIA/SEX - TUMORS - Uterus - myoma – hard

FEMALE GENITALIA/SEX - METRORRHAGIA - fibroids, from

FEMALE GENITALIA/SEX - TUMORS - Uterus - myoma - large

FEMALE GENITALIA/SEX - TUMORS - Uterus - myoma – painful

*“The oneness must not be lost sight of, for they are inseparable in sickness or in health, a biotic whole, and it is only the pathological eye that does separate them and not the physiological or the pathogenetic one. **It is the sick person that is to be treated, not the pathological name.** It is the disturbance of the inner processes of life to which we are to look, and not alone to the outer processes; for the inner processes govern the outer, as the outer manifestation is but an outward expression of the inward process. As this is true of one pathological expression so it holds good in all”. J .H Allen.*

Thus the homoeopathic remedy covers all the phenomena of disease of whatever origin it may be, even to the micro-organisms. When the deranged vital life force resumes its normal, it puts and ends to their existence.
