SEPTEMBER – 2012
ABORTION

The conception and the birth of a child is a dynamic and natural process. It creates a balance between the energetic and the physical plane. Whenever a pregnancy is interrupted through abortion or a miscarriage, the existing balance between the physical and the energetic plane is disturbed. Abortion is a sudden shock and very traumatic to the lady.

In either case (abortion or miscarriage) the physical placenta is removed manually, but the energy of the unborn baby remains inside the womb. This unresolved energy in the women's body leads to the disharmony of the vital energy. This interruption in dynamic force makes the person sick and it starts reflecting on the physical and mental level. The physical body of the human being is governed by his mind. After an abortion, the lady may develop irritability, anxiety, confusion, delirium, prostration of mind, many kinds of fear she may also develop. In these entire conditions homeopathy works very efficiently and help the women to restore her health.

Abortion makes the mind sick and when the governing authority is dominated by the diseased force of abortion, it ultimately comes to the physical plane of the body and the lady develops the physical symptoms which are recognized by the signs and symptoms. Menstrual disorder is the commonest problem a female develops after abortion. She may also develop anemia, weakness, faintness, fever, leucorrhoea, back pain, joint pain, lochia, cough, varicose veins, and inflammation of the uterine region, infertility and in few cases placenta may also retains in the uterus.

ROLE OF HOMEOPATHY: Homeopathy deals with the vital force. It acts on the dynamic plane. Homeopathic medicines are the energies given to the vital force to rejuvenate it. Signs and Symptoms are the lead to the mental sickness. And the energy medicines help to remove the diseased condition at the mental level, leaving in a healthy state. And once the person is mentally healthy, it takes no time to disappear the physical symptoms.
